

Blood Centrifuge

Rotor:

Capacity: 24*10ml Adapter: 1.5ml
 Speed: 4000 rpm RCF: 2147 xg

Introduction:

The blood centrifuge is a kind of equipment that separates the plasma and serum in the blood. The machine is made of steel, and the surface is sprayed, so it has good rigidity, high strength, novel shape, beautiful appearance, low noise, It has the advantages of small temperature rise, safety and reliability. The machine adopts DC brushless maintenance-free motor drive, microcomputer control, and door cover protection, making your operation safer, easier and more reliable.

Features:

- * The whole machine adopts steel structure and stainless steel centrifugal chamber.
- * Embedded microprocessor control, DC brushless motor drive, maintenance-free, smooth operation.
- * Push-button programming design, digital tube display, real-time display of all operating parameters, intuitive and simple operation.
- * Alarm monitoring function, real-time monitoring of lock and motor status, safe and reliable operation.
- * Centrifugal speed, centrifugal time and other parameters can be set, and real-time display of centrifugal force.

Technical Parameters:

Model	BKC-TL4BII
Max. Capacity	24*10ml
Max. Speed	4000rpm
Max. RCF	2147×g
Timing Range	1s~99min
Speed Precision	±10rpm
Noise	≤55dB
Consumption	150W
Power Supply	AC220V, 50/60Hz(Standard); 110V 60Hz (Optional)
External Size(L*W*H) mm	340*425*278
Net Weight(kg)	21
Package Size(L*W*H) mm	420*510*440
Gross Weight(kg)	25
Centrifugable Tube Types	Vacuum blood collection tube 3/5/7/10ml; PRP tube 3/5/7/10ml; PP tube, EP tube 3/5/7/10ml, etc.
